Surabaya, Indonesia

D4 Informatics Engineering graduate from PENS (GPA 3.80) with 10 months of hands-on frontend engineering experience across two industry internships. Skilled in ReactJS and Laravel for building scalable, maintainable web applications, with a strong ability to translate complex technical requirements into clean, efficient code. Also brings proven leadership experience as Head of UKKI PENS and Dormitory Supervisor mentoring 20 scholarship recipients, roles that sharpened my communication, decision-making, and ability to align diverse teams toward shared goals.

Experience

PT Hayago Robotika Indonesia - Surabaya, Indonesia

Aug 2025 - Dec 2025

Frontend Developer, Internship

- Developed a full-featured Online Course web application using ReactJS, enabling structured learning content delivery for end users.
- Built a Computerized Maintenance Management System (CMMS) web portal with ReactJS, streamlining asset maintenance tracking and scheduling workflows for internal operations.

PT Aksamedia Mulia Digital - Surabaya, Indonesia

Feb 2025 - June 2025

Frontend Developer, Internship

- Developed a web-based Education Platform Management System using ReactJS, supporting administrative management of learning content and user accounts.
- Built and deployed the company's official portfolio website using Laravel, improving the company's digital presence and client acquisition pipeline.

SDM IPTEK Scholarship Dormitory Program - Surabaya, Indonesia

Aug 2025 - Present

Supervisor

- Supervised, mentored, and guided 20 scholarship recipients in academic development, personal growth, and dormitory program compliance.
- Coordinated structured coaching sessions and monitored progress to ensure participants met program standards and milestones.

Unit Kegiatan Kerohanian Islam PENS - Surabaya, Indonesia

Aug 2024 - Aug 2025

President (General Chairperson)

- Directed and mentored a team of 43 executive board members, overseeing cross-departmental operations to ensure the seamless execution of campus-wide Islamic programs.
- Spearheaded the successful completion of 54 strategic work programs, driving organizational objectives and fostering active student engagement.

Education

Politeknik Elektronika Negeri Surabaya - Surabaya, Indonesia

Aug 2022 - Jul 2026

Applied Bachelor Degree in Informatics Engineering

GPA: 3.80/4.00

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Agile Methodology, Artificial Intelligence, Web Design Workshops, Non-technical Skills

Skills

- **Frontend** : HTML, CSS, JavaScript, Typescript, ReactJs, NextJs, Tailwind CSS, Redux, Zustand, TanStack
- **Backend** : ExpressJs, FastAPI
- **Mobile** : Dart, Flutter
- **Database** : MySQL, PostgreSQL, MongoDB
- **Other Programming language** : C, Java, Python
- **Soft Skill** : Communication, Teamwork, Adaptability, Collaboration, Problem Solving, Self Organize, Agile Methodology
- **Version Control** : Git, GitHub

CERTIFICATIONS

Software Quality Control Tester

Nov 2024 – Nov 2027

Badan Nasional Sertifikasi Profesi (BNSP) • National Professional Certification Body, Indonesia

PENS English Proficiency Test

Apr 2026 – Apr 2028

Politeknik Elektronika Negeri Surabaya (PENS) • Score: 450

Projects

• Analysis of Graph RAG and Vector RAG Approaches for Optimizing Retrieval-Augmented Generation on JSON Data – Fullstack

Final Project

A comparative study analyzing Graph RAG and Vector RAG approaches to optimize Retrieval-Augmented Generation (RAG) pipelines on structured JSON data. The research evaluates retrieval accuracy, context relevance, and response quality of both approaches, providing insights into selecting the optimal RAG strategy for structured knowledge bases in AI-driven applications.

Technologies: Python, LangChain, Neo4j, ChromaDB, OpenAI API

• Online Course Platform – Website

Built as part of internship project at Hayago Robotika Indonesia.

A responsive web-based Online Course platform designed to deliver structured learning content to students and professionals. The platform supports course catalog browsing, module-based lesson navigation, user enrollment management, and progress tracking. Built with a focus on intuitive user experience, enabling learners to access materials across devices with consistent performance.

Technologies: React.js, TypeScript, Tailwind CSS, Redux

• Computerized Maintenance Management System (CMMS) – Website

Built as part of internship project at Hayago Robotika Indonesia.

An internal web system developed to digitize and streamline the company's asset maintenance operations. The CMMS enables maintenance teams to log work orders, schedule preventive maintenance tasks, track asset health, and generate service reports. Replacing manual workflows with an efficient, centralized digital solution. Features include a real-time dashboard, role-based access control, and task assignment management.

Technologies: React.js, TypeScript, Tailwind CSS, TanStack

• Company Profile Website for Architecture Firm – Website

Built as part of internship project at Aksamedia.

A modern, responsive company profile website created to showcase the portfolio, team, and services of an architecture and interior design firm. Designed with a clean layout to reflect the client's aesthetic, the website includes sections for company background, service highlights, and dynamic project galleries.

Technologies: Laravel, Blade, Tailwind CSS, MySQL, GSAP.
